Write a program using function to calculate the simple interest. Suppose the customer is a senior citizen. He is being offered 12 percent rate of interest; for all other customers, the ROI is 10 percent.

Sample Input:
Enter the principal amount: 200000
Enter the no of years: 3
Is customer senior citizen (y/n): n

Sample Output:
Interest: 60000

```

1. Principal: 2000 , Years: 0
2. Principal: 20000 , Years: -2
3. Principal: -2000 , Years: 2
4. Principal: 2 , Years: 2000
5. Principal: 0 , Years: 5

```

Your Code

```

1 import java.util.Scanner;
2 public class Main{
3     public static void main(String[] args){
4         Scanner sc = new Scanner(System.in);
5         int principalamount = sc.nextInt();
6         int years = sc.nextInt();
7         int seniorCitizen = sc.nextInt();
8         int resp = 0;
9         if(years>0)
10            {
11                if(seniorCitizen=="resp")
12                {
13                    int interest = principalamount*years;
14                    System.out.println("Interest :"+interest);
15                }
16                else
17                {
18                    int interest = (principalamount*years)/10;
19                    System.out.println("Interest :"+interest);
20                }
21            }
22            else
23                System.out.println("Invalid Input");
24
25            sc.close();
26        }
27    }

```

Output

```
Interest :4000
```

Level 1 — Easy (E) Square-Cube — Numbers

Write a program to find the square, cube of the given decimal number

Sample Input:
Given Number: 0.6
Sample Output:
Square Number: 0.36
Cube Number:0.216

```

1. 12
2. 0
3. -0.5
4. 14.25
5. -296

```

Your Code

```

1 import java.util.Scanner;
2 public class main{
3     public static void main(String[] args){
4         Scanner sc = new Scanner(System.in);
5         float n = sc.nextFloat();
6         float square = n*n;
7         float cube = n*n*n;
8         System.out.println("Square Number: "+square);
9         System.out.println("Cube Number: "+cube);
10        sc.close();
11    }
12 }
13 }

```

Output

```

Square Number: 0.36
Cube Number: 0.216

```
